

# LET'S WORK TOGETHER TO PUT PEOPLE FIRST

## Your opinion will help improve the services we provide

Putting people first is important to us all. That means being person-centred to the people we serve and our staff.

Help us to achieve excellence in person-centred care by joining in the Valuing People Organisational Self-Assessment.

Developed by Alzheimers Australia, it is a process that will help us to identify where we are succeeding in delivering person-centred care and areas in need of improvement by getting the perspective of all our stakeholders: consumers; carers; staff and executives.
